***Practice at every station of the interview***

***1 day face-to-face + 7.5 hr virtual small group sessions  
+ 4 hr virtual 1-to-1 sessions + mock interview***

## Performing for the ST3 Interview in Plastic Surgery

**Day 1: 3<sup>rd</sup> November 2022**

***Plus over 12 hours virtual training***

***Suitable for all trainees being interviewed in April 2023  
and also for those preparing early for future interviews***

At Surgical Art we believe that the ST3 interview does not just identify a potential Registrar but rather a future Consultant. This structured course maintains this philosophy at the centre of its delivery.

This comprehensive programme covered over both in person (1 day) and virtual (12+hours) sessions crystallises the extensive research from a number of successful trainee experiences (including one who ranked 1<sup>st</sup> Nationally) and combines it with Surgical-Art's unique approach to verbal & non-verbal communication skills, strategy and preparation taking you from application through to interview. Covering all elements of the interview you will have an opportunity to gain a deep insight into the process and tap into a wealth of knowledge from both Trainees and Consultants who will provide you with a holistic and higher order perspective to the interview.

We will work with you to help you display clarity of thought and highlight your strengths, maximising your chances to succeed. Most crucially you will benefit from a bespoke, detailed and unhurried feedback from all faculty.

*Course Fee: £1500*
